PROFESSIONAL MANIPULATION. Leading Stocks Show Mixture of Fractional Gains and Losses.

New York, July 31-The most striking feature of today's stock market was its extreme susceptibility to professional manipulation and the continued absence of outside or public in-terest in its advances or declines, The irregular and reactionary tendencies manisfested at various times offered or bladder trouble it further evidence that every movement ROOT you have kidney, liver beyond mere fractions has its origin in the operation of a clique of traders, who have not hesitated to avail themselves of outside influences on markets, including London, in their efforts to carry their maneuvres to a successful conclusion.

Initial trading reflected the unsettled conditions which have characterized business on the local evchange all through the week. Leading stocks showed the usual mixture of gains and osses, in no case extending beyond fractions except in Canadian Pacific, which soon fell a full point, and in Illinois Central, which made a lower record than on the preceding day.

Before the end of the first hour, however, all lesses were effected, with marked strength in Steel, Union Pa-cific, Amalgamated and Reading. Trading in steel was especially notebecause of the large blocks aken at best prices in many months. New Haven also reflected pressure, the convertible sixes losing a point in connection with the sale of some of the company's trolley lines, coupled with a protest against the proposed issue of the new debentures

In the later dealings, which were attended with frequent periods of stagnation, fractional recoveries from lowest prices were recorded. closing was heavy, with no material net changes except in the issues

The general bond market was irregular, and government bonds on call were unchanged. Total sales par value were \$1,440,000.
